다!

안녕하세요.

# Who's a Scientist?

There are many kinds of scientists.

You can be one, too.

## A Scientist:

- observes
- measures
- compares
- classifies
- makes a model
- infers
- communicates
- puts things in order
- predicts
- investigates
- draws a conclusion

## Scientists observe.

Use your senses. Find the word OBSERVE three times in the box below. Did you observe other words? You are a scientist, too!

## Scientists measure.

Look at the two flowers.  
Which black dot is bigger?  
Measure to find out.

## Scientists compare and classify things.

Compare the animals in this picture.  
Find the animals without legs.  
You are a scientist, too!

## Scientists make models.

Make a model like this one.  
How well did it work?  
You are a scientist, too!

54

## Scientists infer.

Who ate the cookies?  
What clues help you know?  
You are a scientist, too!

55

## Scientists communicate.

Read each clue below.  
Which animal is it?  
Tell others your ideas.

1. This animal is green.

2. This animal has a tail.

3. This animal has a shell.

## Scientists put things in order.

Name the animals in ABC order.

duck

cow

pig

dog

lamb

horse

## Scientists predict.

Predict which of these animals  
would be next.

skunk

rabbit

## Scientists investigate and draw conclusions.

Investigate to find out which string is not being held. What conclusion did you draw?
